RESEARCH	Information theory, communication theory, machine learning
PERSONAL	Born on November 28, 1977 in Turin, Italy; Italian citizenship; male; married with two children; languages: Italian, English, German, Swedish
EDUCATION	<ul style="list-style-type: none">◇ Mar. 2012: Chalmers University of Technology, Sweden Docent diploma in Information Theory◇ Mar. 2006: Politecnico di Torino, Italy Ph.D. in electrical and communication engineering<ul style="list-style-type: none">· Doctoral dissertation: <i>Noncoherent fading channels: capacity and coding</i>· Advisor: Professor Sergio Benedetto (Politecnico di Torino, Italy)◇ Nov. 2001: Politecnico di Torino, Italy Telecommunications Engineering Diploma [M.Sc.], <i>summa cum laude</i><ul style="list-style-type: none">· Diploma dissertation: <i>Analysis and simulation of an ultra-wideband communication system over a multipath channel</i>· Advisors: Professor Sergio Benedetto (Politecnico di Torino, Italy), Dr. Giovanni Romano (Telecom Italia Lab, Turin, Italy)
ACADEMIC WORK EXPERIENCE	<ul style="list-style-type: none">◇ Jun. 2020-current: Full professor at Chalmers University of Technology, Sweden◇ Feb. 2016-current: Co-director information and communication technology (ICT) area of advance at Chalmers University of Technology, Sweden◇ Oct. 2018-Dec. 2020: Co-director of Chalmers artificial-intelligence research center (CHAIR)◇ Jan. 2017-May 2020: Professor at Chalmers University of Technology, Sweden◇ Dec. 2013-Dec. 2016: Associate professor at Chalmers University of Technology, Sweden◇ Nov. 2010-Nov. 2013: Assistant professor at Chalmers University of Technology, Sweden◇ Apr. 2012: Guest professor at Vienna University of Technology, Austria◇ Feb. 2008-Oct. 2010: Senior researcher at ETH Zurich, Switzerland◇ Feb. 2006-Jan. 2008: Postdoctoral researcher at ETH Zurich, Switzerland◇ Nov. 2004-Nov. 2005: Visiting researcher at ETH Zurich, Switzerland◇ Mar. 2004-Jul. 2004: Visiting researcher at Università di Pisa, Italy◇ Jan. 2002-Jan. 2006: Junior researcher at Istituto Superiore Mario Boella, Turin, Italy
INDUSTRIAL WORK EXPERIENCE	<ul style="list-style-type: none">◇ Sep. 2018-Sep. 2020: Visiting researcher at Qamcom Research & Technology AB, Sweden◇ Jan. 2014-2017: Visiting researcher at Ericsson Research, Sweden◇ Nov. 2002-Apr. 2003: Visiting researcher at IMST GmbH, Germany◇ Feb. 2001-Nov. 2001: Master thesis internship at Telecom Italia Lab, Turin, Italy

Giuseppe Durisi: Curriculum Vitae

- HONORS
- ◇ 2022: *3rd place award* at the Asilomar Conference on Signals, Systems and Computers *student paper contest* (lead author: Ph.D. student Oguz Kislal)
 - ◇ 2017: exemplary reviewer, IEEE Transactions on Wireless Communications
 - ◇ 2016: exemplary reviewer, IEEE Transactions on Communications
 - ◇ 2013 IEEE ComSoc Young Researcher Award for Europe, Middle East, and Africa Region
 - ◇ 2013 IEEE Sweden VT-COM-IT Chapter *best student conference paper award* (lead author: Ph.D. student Wei Yang)
 - ◇ *Student paper award* at the IEEE International Symposium on Information Theory (ISIT 2012) (lead author: Ph.D. student Wei Yang)
 - ◇ *Senior member* of the Institute of Electrical and Electronics Engineers (IEEE), Feb. 2012
 - ◇ *Optime* award from Unione Industriale, Turin, Italy (for best graduates of the year 2001)
- TEACHING & SUPERVISION
- ◇ Chalmers University of Technology: **Lecturer**
 - 2021-2022: Digital communications (7.5 credits, master course, fall semester, taught in English)
 - 2021-2022: Probability and statistical learning using python (7.5 credits, master course, fall semester, taught in English)
 - 2020-2022: Statistics and machine learning in high dimensions (7.5 credits, master/PhD course, fall semester, taught in English)
 - 2011-2021: Information theory (7.5 credits, master/PhD course, spring semester, taught in English)
 - 2012-2022: Wireless communications (7.5 credits, master course, spring semester, taught in English, *guest lecturer*)
 - 2016-2018: Probability and random processes (7.5 credits, master/PhD course, fall semester, taught in English)
 - 2014-2018: Electrical measurements: systems and methods (7.5 credits, bachelor course, spring semester, taught in English/Swedish)
 - 2011: Network information theory (7.5 credits, PhD course, fall semester, taught in English)
 - ◇ Vienna University of Technology: **Lecturer**
 - 2012: Network information theory (1.5 unit, graduate/PhD short course, spring semester, taught in English)
 - ◇ ETH Zurich: **Teaching assistant** for graduate courses
 - 2007-2010: Fundamentals of wireless communications (4-unit graduate course, spring semester, taught in English)
 - 2009: Receivers for wireless communications (4-unit graduate course, spring semester, taught in English)
 - 2009: Harmonic analysis: theory and applications in advanced signal processing (4-unit graduate course, spring semester, taught in English)
 - ◇ Politecnico di Torino: **Teaching assistant** for undergraduate courses
 - 2005: Analysis of discrete-time signals (2-unit undergraduate course, fall semester, taught in Italian)
 - 2003-2004: Signal theory (2-unit undergraduate course, fall semester, taught in Italian)
 - ◇ Currently supervised Ph.D. students at Chalmers University of Technology:
 - Jayadev Naram, *Information theoretic generalization bounds*, started in 2023
 - S. Tabakovic, *Theory of deep learning*, started in 2020 (co-supervisor)
 - L. Aabel, *Distributed massive MIMO with low-precision components*, started in 2020

Giuseppe Durisi: Curriculum Vitae

- O. Kislal, *Joint coding and queuing analyses in ultra-reliable low-latency communications*, started in 2019 (co-supervisor)
- Y. Etefagh, *Multiantenna wireless architectures*, started in 2017
- ◇ Current post-doctoral fellows at Chalmers University of Technology:
 - K-H. Ngo, *Secure and private massive cloud/edge connectivity*, 2020–present
- ◇ Past post-doctoral fellows at Chalmers University of Technology:
 - A. Lancho, *Massive multiple-access communications for IoT applications*, 2019–2021
 - A. Rezazadeh, *Information-theoretic methods in machine, learning*, 2019–2022
 - G. C. Ferrante, *finite blocklength information theory*, 2017–2018
- ◇ Past Ph.D. students
 - F. Hellström, *Information-Theoretic Generalization Bounds: Tightness and Expressiveness*, PhD 2023 (main supervisor, Chalmers University of Technology)
 - J. Östman, *Ultra-Reliable Short-Packet Communications: Fundamental Limits and Enabling Technologies*, PhD 2020 (co-supervisor, Chalmers University of Technology)
 - S. Jacobsson, *Massive multiantenna communications with low-resolution converters*, PhD 2019 (main supervisor, Chalmers University of Technology)
 - K. Keykhosravi, *Capacity analysis and receiver design in the presence of fiber nonlinearity*, PhD 2019 (co-supervisor, Chalmers University of Technology)
 - R. Devassy, *Delay and throughput bounds for the design of next generation wireless systems*, PhD 2019 (main supervisor, Chalmers University of Technology)
 - W. Yang, *Fading channels: capacity and channel coding rate in the finite-blocklength regime*, PhD 2015 (main supervisor, Chalmers University of Technology)
 - M. R. Khanzadi, *Phase noise in communication systems: modeling, compensation, and performance analysis*, PhD 2015 (co-supervisor, Chalmers University of Technology)
 - P. Kuppinger, *General uncertainty relations and sparse signal recovery*, PhD 2011 (co-supervisor, ETH Zurich)
 - V. I. Morgenstern, *Crystallization and noncoherence in wireless communication*, PhD 2010 (co-supervisor, ETH Zurich)
 - U. G. Schuster, *Wireless communication over wideband channels*, PhD 2007 (co-supervisor, ETH Zurich)

PROFESSIONAL SERVICE ◇ Editorships:

- Guest editor, IEEE Journal on Selected Areas in Information Theory; Special issue on “Information Theoretic Foundations of Future Communication Systems”, 2021
- Associate editor, IEEE Transactions on Communications, 2015-2021
- Publications editor, IEEE Transactions on Information Theory, 2011-2014.
- ◇ Member of the organizing committee:
 - Track chair European Conference on Networks and Communications (EUCNC), Gothenburg, Sweden, June 2023
 - Recent-result chair, International Symposium on Information Theory (ISIT), Espoo, Finland, June 2022
 - Publication chair, Information Theory Workshop (ITW), Riva del Garda, Italy, September 2020
 - Track chair, Asilomar Conference on Signals, Systems, and Computers, Pacific Grove, California, USA, Nov. 2019
 - Publication chair, International Symposium on Information Theory (ISIT), Aachen, Germany, Jul. 2017

Giuseppe Durisi: Curriculum Vitae

- Chair, European School of Information Theory (ESIT), Gothenburg, Sweden, May 2016
- Local organizer, 7th *International Symposium on Turbo Codes & Iterative Information Processing (ISTC)*, Gothenburg, Sweden, Aug. 2012
- Chair, Workshop on *Machine Learning and Large Data Sets*, Gothenburg, Sweden, Aug. 2011
- Chair, 1st workshop on *Ultra-Wideband for Wireless Personal Area and Sensor Networks*, Turin, Italy, Nov. 2004
- ◇ Technical program committee membership:

<i>IEEE Int. Conf. Commun. (ICC):</i>	2006, 2011–2016, 2018–2023
<i>IEEE Int. Conf. Comp. Comm. (INFOCOM):</i>	2023
<i>IEEE Int. Workshop Signal Process. Advances Wireless Commun. (SPAWC):</i>	2021–2022
<i>Int. Veh. Tech. Conf. (VTC):</i>	2017–2019
<i>Int. Zurich Seminar (IZS):</i>	2014–2022
<i>IEEE Global Commun. Conf. (GLOBECOM):</i>	2011–2013, 2018, 2021–2022
<i>Int. Conf. Telecommun. (ICT)</i>	2015, 2018
<i>Int. Symp. Wirel. Commun. Sys. (ISWCS):</i>	2011, 2017, 2018
<i>Int. ITG Conf. Sys. Commun. Coding (SCC):</i>	2017, 2019, 2022
<i>IEEE Inf. Theory. Workshop (ITW):</i>	2016
<i>IEEE Wirel. Commun. Net. Conf. (WCNC):</i>	2013–2016, 2019
<i>Int. Workshop Physic Wirel. Comm. Net. (PHYSCOMNET):</i>	2014
<i>Int. Conf. Comput. Net. Commun. (ICNC):</i>	2012, 2018
<i>Int. Symp. Personal, Indoor, Mobile Radio Commun. (PIMRC):</i>	2012
<i>IEEE Swedish Commun. Tech. Workshop (SWE-CTW):</i>	2011, 2012
<i>Int. Conf. on Commun. Net. in China (CHINACOM):</i>	2010
<i>IEEE Int. Conf. Ultra-Wideband (ICUWB):</i>	2009
- ◇ Invited-session organizers at

<i>Asilomar Conference on Signals, Systems, and Computers:</i>	2022
<i>IEEE Inf. Theory Workshop (ITW):</i>	2020
<i>Int. Zurich Seminar (IZS):</i>	2016
<i>Int. Symp. Wirel. Commun. Sys. (ISWCS):</i>	2014
- ◇ Referee for the European Research Council (ERC)
- ◇ Referee for the Swedish Research Council (Vetenskapsrådet)
- ◇ Referee for the Israel Science Foundation
- ◇ Referee for the Italian agency for the evaluation of universities and research institutes (AN-VUR)
- ◇ Referee for the German Verband der Elektrotechnik Elektronik Informationstechnik (VDE-ITG)
- ◇ Referee for the Austrian Wiener Wissenschaft- Forschungs- und Technologiesfonds (WWTF)
- ◇ Member of examination committee/opponent in research degree examinations
 - Antonino Favano, *The Capacity of Amplitude-Constrained Vector Gaussian Channels*, Ph.D. Thesis, Politecnico di Milano, Italy, Jan. 2023
 - Linghui Zhou, *Information-Theoretic Privacy and Secrecy in Biometric Identification and Authentication*, Ph.D. Thesis, Royal Institute of Technology, Sweden, Oct. 2022.
 - Kassem Saied, *Quasi-Cyclic Short Packet Transmission for IoT*, Ph.D. Thesis, Université Bretagne Sud, France, Mar. 2022.

Giuseppe Durisi: Curriculum Vitae

- Emmanouil Foutoulakis, *Performance and Optimization Aspects of Time Critical Networking*, Ph.D. Thesis, Linköping University, Sweden, Oct. 2021.
- Khac-Hoang Ngo, *Non-coherent Wireless Communications: Fundamental Limits and System Design*, Ph.D. Thesis, University of Paris-Saclay, France, July 2020
- Apostolos Avranas, *Resource Allocation for Latency Sensitive Wireless Systems*, Ph.D. Thesis, Telecom Paris, France, Jun. 2020.
- Emmanouil Fountoulakis, *Performance Analysis and Optimization for Time Critical Networking*, Licentiate Thesis, Linköping University, Sweden, Oct. 2019.
- Jun Li, *Ultra-low latency communication for 5G transport network*, PhD Thesis, Royal Institute of Technology, Sweden, Sep. 2019.
- Sebastian Schiessl, *Performance Trade-offs for Ultra-Reliable Low-Latency Communication Systems*, PhD Thesis, Royal Institute of Technology, Sweden, Jun. 2019.
- Silvio Mandelli, *Analysis of Wiener phase noise issues in optical transmission systems*, PhD Thesis, Politecnico di Milano, Italy, Jan. 2016.
- Simone Pecorino, *Information rates of channels with memory by Bayesian tracking*, PhD Thesis, Politecnico di Milano, Italy, Jan. 2016.
- Zhao Wang, *Interference Alignment with Imperfect Channel Knowledge and Secrecy Constraints*, PhD Thesis, Royal Institute of Technology, Sweden, May 2015.
- Günther Koliander, *Information-theoretic analysis of noncoherent block-fading channels and singular random variables*, PhD Thesis, Vienna University of Technology, Vienna, Austria, Apr. 2015
- Hien Quoc Ngo, *Massive MIMO: fundamentals and system designs*, PhD Thesis, Linköping University, Sweden, Mar. 2015
- David Gustafsson, *Extending the bandwidth of the Doherty power amplifier*, PhD thesis, Chalmers University of Technology, Sweden, Sep. 2014
- Nicolas Schrammar, *On deterministic models for Gaussian networks*, PhD thesis, KTH Royal Institute of Technology, Sweden, Jun. 2013
- Hien Quoc Ngo, *Performance bounds for very large multiuser MIMO systems*, Licentiate thesis, Linköping University, Sweden, Dec. 2012
- Lu Lu, *Wireless broadcasting with network coding*, Licentiate thesis, KTH Royal Institute of Technology, Sweden, Sep. 2011
- P. Kuppinger, *General uncertainty relations and sparse signal recovery*, PhD thesis, ETH Zurich, Switzerland Feb. 2011

FUNDING

- ◇ “Goal-oriented communications: When is semantic feedback useful?”, Swedish Research Council 2022-05571 project grant, 3 600 kSEK, responsibility: **co-investigator**
- ◇ “SAICOM: Software Artificial Intelligence for Communications”, Swedish Foundation for Strategic Research (SSF), Future software systems, 2022-2026, 35 000 kSEK, responsibility: **co-investigator**
- ◇ “Evaluated mutual information bounds for learning and metalearning”, Wallenberg AI, autonomous systems, and software program 2023-2027, responsibility: **principal investigator**
- ◇ “Energy-efficient massive random access for real-time distributed autonomous systems”, Swedish Research Council 2021-04970 project grant, 2022-2025, 4 000 kSEK, responsibility: **principal investigator**
- ◇ “LANTERN: Low-latency and private edge computing in random-access networks”, Marie Skłodowska-Curie Individual Fellowship 2021-2022, responsibility: **co-supervisor** (fellow: K.-H. Ngo)
- ◇ “Information-theoretic limits for deep neural networks”, Marie Skłodowska-Curie Individual Fellowship 2020-2021, responsibility: **supervisor** (fellow: A. Rezazadeh)

- ◇ “Generalization bounds for deep neural networks: Insight and Design” Wallenberg AI, autonomous system, and software program, 2020-2025, responsibility: **co-investigator**
- ◇ “Non-coherent low-latency communications”, German DAAD-DLR fellowship, 25 kSEK, 2019, responsibility: **principal investigator**
- ◇ “Distributed massive MIMO with low-precision components”, Swedish Foundation for Strategic Research (SSF), Industrial PhD grant, 2 500 kSEK, 2020-2024, responsibility: **principal investigator**
- ◇ “Secure, Private, and Low-Latency Cloud Connectivity for IoT Applications”, WASP expedition project, 2019-2021, responsibility: **principal investigator**
- ◇ “Communication in time: theory and practice for the automated society”, Swedish Research Council, *2018-04359 project grant* 2019-2022, 4 000 kSEK, responsibility: **co-investigator**
- ◇ “Low-Latency Wireless Random Access for IoT connectivity”, Swedish Foundation for Strategic Research (SSF), Mobility Grant, 933 kSEK, 2018-2019, responsibility: **principal investigator**
- ◇ “Protection in a Power-Electronic Converter Dominated Medium-Voltage Microgrid Utilizing Digital Communication”, Chalmers Energy Area of Advance, 2MSEK, 2018-2019, responsibility: **co-investigator**
- ◇ “Wireless communication for stability and performance enhancement in converter-dominated AC microgrids”, Chalmers E2 seed fund, 250 kSEK, 2018, responsibility: **co-investigator**
- ◇ “INNER–information theory of deep neural networks”, Chalmers E2 seed fund, 500 kSEK, 2018, responsibility: **principal investigator**
- ◇ “SWIFT–short-packet wireless information theory”, Swedish Research Council, *2016-03293 project grant* 2017-2020, 3 680 kSEK **principal investigator**
- ◇ “mmMAGIC–Millimetre-Wave Based Mobile Radio Access Network for Fifth Generation Integrated Communications”, European Commission, Horizon 2020, 2015-2017, responsibility: **project member**
- ◇ “Massive MIMO systems with low-precision converters”, Swedish Foundation for Strategic Research (SSF), Industrial PhD grant, 2 500 kSEK, 2015-2019, responsibility: **principal investigator**
- ◇ “Theory and practice for optimum spectral efficiency for ad-hoc wireless networks with strict requirements on latency and reliability”, Swedish Research Council, *2014-6066 project grant* 2015-2018, 3 643 kSEK **co-investigator**
- ◇ “Multi-antenna technologies for wireless access and backhaul (MATWAB)”, VINNOVA, 3570 kSEK, 2015-2016; responsibility: **co-investigator and project manager**
- ◇ “Massive MIMO: from hype to roll-out”, Ericsson AB, 4000 kSEK, 2014-2016, **co-investigator**
- ◇ “Nonlinear hardware impairments in massive MIMO systems”, Swedish Foundation for Strategic Research (SSF), Strategic Mobility Grant, 942 kSEK, 2014-2015, responsibility: **principal investigator**
- ◇ “Optical interference is not noise”, Swedish Research Council, *2013-5271 project grant*, 4 720 kSEK, 2014-2017; responsibility: **co-investigator**
- ◇ “Multipath test environment for future communication systems” Swedish Research Council, *2013-5718 industrial Ph.D. project grant*, 2 156 kSEK, 2014-2017; responsibility: **co-investigator**
- ◇ “Fundamental limits of user cooperation in wireless networks”, Swedish Research Council, *2012-4571 Junior researcher grant*, 3 280 kSEK; 2013-2016; responsibility: **principal investigator**
- ◇ “Handling the data flood in wireless communications”, Chalmers *Area of Advance* initiative: Information and Communication Technology; 8 000 kSEK; 2010-2014; responsibility: **principal investigator**

Giuseppe Durisi: Curriculum Vitae

PUBLICATIONS: Since 2001, Dr. Durisi has published a book, 50 journal papers, and 104 conference papers.
OVERVIEW These papers received 7651 citations according to [Google Scholar](#), with a corresponding *h-index* of 39. The publications are listed below in reversed chronological order.

PREPRINTS

- [P6] Y. Etefagh, S. R. Aghdam, G. Durisi, S. Jacobsson, M. Coldrey, and C. Studer, “Performance of quantized massive MIMO with fronthaul rate constraint over quasi-static channels,” Mar. 2023
- [P5] K.-H. Ngo, G. Durisi, A. G. i. Amat, P. Popovski, A. E. Kalor, and B. Soret, “Unsourced multiple access with common alarm messages: Network slicing for massive and critical IoT,” Feb. 2023.
- [P4] A. Munari, F. Lázaro, and G. Durisi, “The dynamic behavior of frameless ALOHA: stability, throughput, and age of information,” Dec. 2022.
- [P3] A. O. Kislal, A. Lancho, G. Durisi, and E. Ström, “Efficient evaluation of the error probability for pilot-assisted URLLC with Massive MIMO,” Nov. 2022.
- [P2] A. Lancho, G. Durisi, and L. Sanguinetti, “Cell-free massive MIMO for URLLC: A finite-blocklength analysis,” Jul. 2022.
- [P1] G. Durisi and A. Lancho, *Transmitting short packets over wireless channels—an information-theoretic perspective*, Lecture Notes, Nov. 2020. [[Online](#)]

PUBLICATIONS:

BOOK

- [B1] A. Zaidi, F. Athley, J. Medbo, U. Gustavsson, G. Durisi, and X. Cheng, *5G Physical Layer: principles, models and technology components*. Academic Press, 2018.

PUBLICATIONS:

BOOK

CHAPTERS

- [BC1] G. Durisi, G. Liva, and Y. Polyanskiy, “Short-packet transmission,” in *Information Theoretic Perspectives on 5G Systems and Beyond*, I. Marić, S. Shamai (Shitz), and O. Simeone, Eds. London, U.K.: Cambridge Univ. Press, Jul. 2020.
- [BC2] G. Durisi, U. G. Schuster, V. I. Morgenshtern, H. Bölcskei, and S. Shamai (Shitz), “Information theory of underspread WSSUS channels,” in *Wireless Communications over Rapidly Time-Varying Channels*, F. Hlawatsch and G. Matz, Eds. Academic Press, Mar. 2011.

PUBLICATIONS:

JOURNAL

PAPERS

- [J50] K.-H. Ngo, A. Lancho, G. Durisi, and A. Graell i Amat, “Unsourced multiple access with random user activity,” *IEEE Trans. Inf. Theory*, 2023, to appear.
- [J49] S. T. Jose, O. Simeone, and G. Durisi, “Transfer meta-learning: Information-theoretic bounds and information meta-risk minimization,” *IEEE Trans. Inf. Theory*, vol. 68, no. 1, pp. 474–501 Jan. 2022.
- [J48] F. Hellström and G. Durisi, “Corrections to “Generalization bounds via information and conditional information density”, *IEEE J. Sel. Areas Inf. Theory*, vol. 2, no. 3, pp. 1072–1073, Sep. 2021.
- [J47] J. Östman, A. Lancho, G. Durisi, and L. Sanguinetti, “URLLC with Massive MIMO: Analysis and design at finite blocklength,” *IEEE Trans. Wireless Commun.*, vol. 20, no. 10, pp. 6387–6401, Oct. 2021.
- [J46] I. C. Sezgin, L. Aabel, S. Jacobsson, G. Durisi, Z. S. He, and C. Fager, “All-digital, radio-over-fiber, communication link architecture for time-division duplex distributed antenna system,” *J. Lightw. Technol.*, vol. 39, no. 9, pp. 2769–2779, Feb. 2021.
- [J45] J. Östman, R. Devassy, G. Durisi, and E. G. Ström, “Short-packet transmission via variable-length codes in the presence of noisy stop feedback,” *IEEE Trans. Wireless Commun.*, vol. 20, no. 1, pp. 214–227, Jan. 2021.

- [J44] F. Hellström and G. Durisi, “Generalization bounds via information density and conditional information density,” *IEEE J. Sel. Areas Info. Theory*, vol. 1, no. 3, pp. 824–839, Nov. 2020.
- [J43] A. Lancho, J. Ostman, G. Durisi, T. Koch, and G. Vazquez-Vilar, “Saddlepoint approximations for short-packet wireless communications,” *IEEE Trans. Wireless Commun.*, vol. 19, no. 7, Jul. 2020.
- [J42] O. Castañeda, S. Jacobsson, G. Durisi, T. Goldstein, and C. Studer, “High-bandwidth spatial equalization for mmWave massive MU-MIMO with processing-in-memory,” *IEEE Trans. Circuits Syst. II: Express Briefs*, vol. 67, no. 5, pp. 891–895, May 2020.
- [J41] O. Castañeda, S. Jacobsson, G. Durisi, T. Goldstein, and C. Studer, “Finite-alphabet MMSE equalization for all-digital massive MU-MIMO mmWave communications,” *IEEE J. Sel. Areas Commun.*, vol. 38, no. 9, pp. 2128–2141, Sep. 2020.
- [J40] A. Lancho, T. Koch, and G. Durisi, “On single-antenna Rayleigh block-fading channels at finite blocklength,” *IEEE Trans. Inf. Theory*, vol. 66, no. 1, pp. 496–519, Jan. 2020.
- [J39] K. Keykhosravi, E. Agrell, and G. Durisi, “Accuracy assessment of nondispersive optical perturbative models through capacity analysis,” *Entropy*, vol. 21, no. 8, Aug. 2019.
